

# Your mental health at work during COVID-19

Summary report on the NSW Government Have Your Say digital community engagement

May 2021

# Context

## Why?

- Most of us spend about a third or more of our waking lives at work. It's a huge part of what we do and can have a significant impact on our mental health in a positive or negative way
- COVID-19 brought about significant change in the workplace
- The NSW Government wanted to better understand and support this change by asking the community to have their say at [haveyoursay.nsw.gov.au/mentally-healthy-workplaces](https://haveyoursay.nsw.gov.au/mentally-healthy-workplaces)

## Partnership approach

- Experts from across NSW Government partnered with the NSW Department of Customer Service to develop and promote this engagement

## Supporting mentally healthy workplaces

- Customer feedback from this engagement has informed the refreshed the NSW Government's Mentally Healthy Workplaces Strategy 2018-2022, and will continue to shape related policy across government

# What we told community and stakeholders

2020 was a challenging year, COVID-19 changed the way we live and work

1

The NSW Government wanted to know how COVID-19 affected mental health in NSW workplaces

2

We asked about job security, working from home, workplace support and how government can help

3

Customer feedback is shaping government policy to support mentally healthy workplaces

4

# About this report

## This report:

- Outlines findings from responses to an online engagement run by the NSW Government about the impacts of COVID-19 on mental health at work
- Summarises the main themes from the consultation for the NSW Government to consider

## The engagement:

- Ran on the nsw.gov.au digital engagement platform from 7 October to 6 November 2020
- Was promoted via channels including a media release, electronic direct mail, social media, in Service NSW Service Centres and on nsw.gov.au
- Received 10,336 survey responses, 8,694 quick poll responses and 2,634 idea contributions

# Methodology

- The engagement was open to all members of the NSW community online to answer a survey, take a quick poll and submit ideas about what's been most helpful in managing mental health at work during COVID-19
- Respondents were asked a series of workforce, demographic and geographic questions
- Sentiment analysis was undertaken in addition to quantitative reporting of data

# Participation: the engagement numbers

We asked how COVID-19 has affected mental health in NSW workplaces and how government can help

**Four weeks**

7 Oct – 6 Nov 2020

**36.2K**

Unique visitors

**8,694**

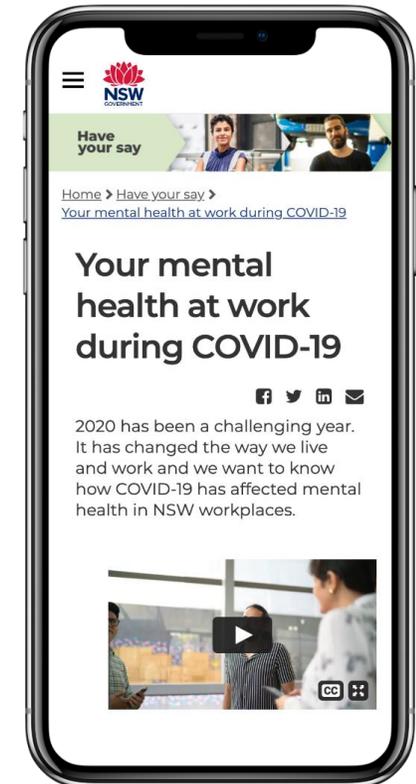

Contributions to quick polls

**10,336**

Surveys completed

**2,634**

Ideas and responses to ideas

The engagement rate reflects the number of people who visited the consultation page **and** actively participated in the consultation

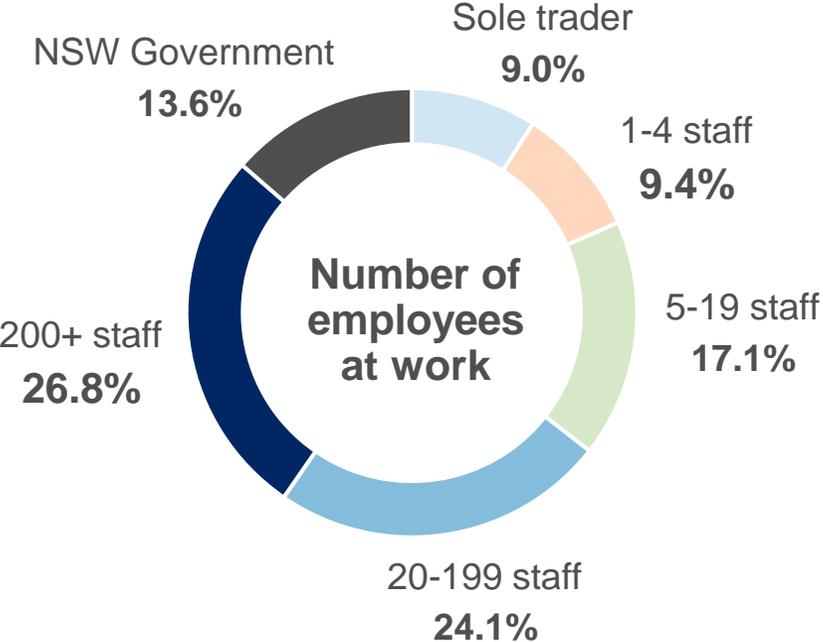

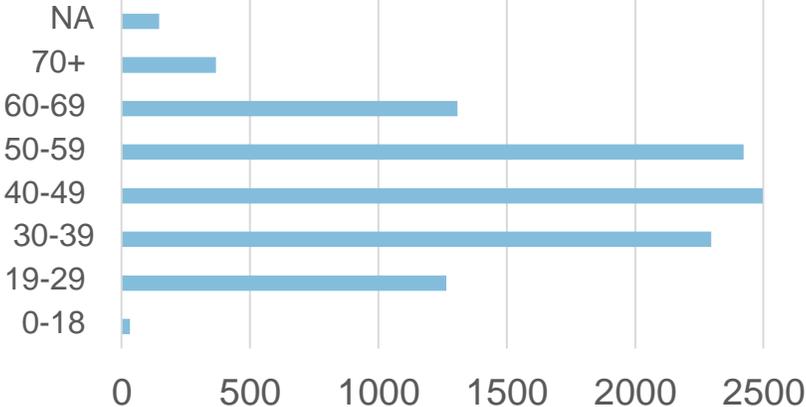

# Profile of survey respondents

## Employment status

## Age groups

## Work locations

# Customer profile

Respondents worked in sectors including:

Health  
Care and  
Social  
Assistance  
**1,577**

Education  
and  
Training  
**1,231**

Professional,  
Scientific  
and  
Technical  
**809**

Finance and  
Insurance  
**635**

Retail trade  
**558**

Administrative  
and Support  
**545**

Information  
Media and  
Telecomms  
**466**

Public Admin  
and Safety  
**444**

Construction  
**433**

Accommodation  
and Food  
Services  
**339**

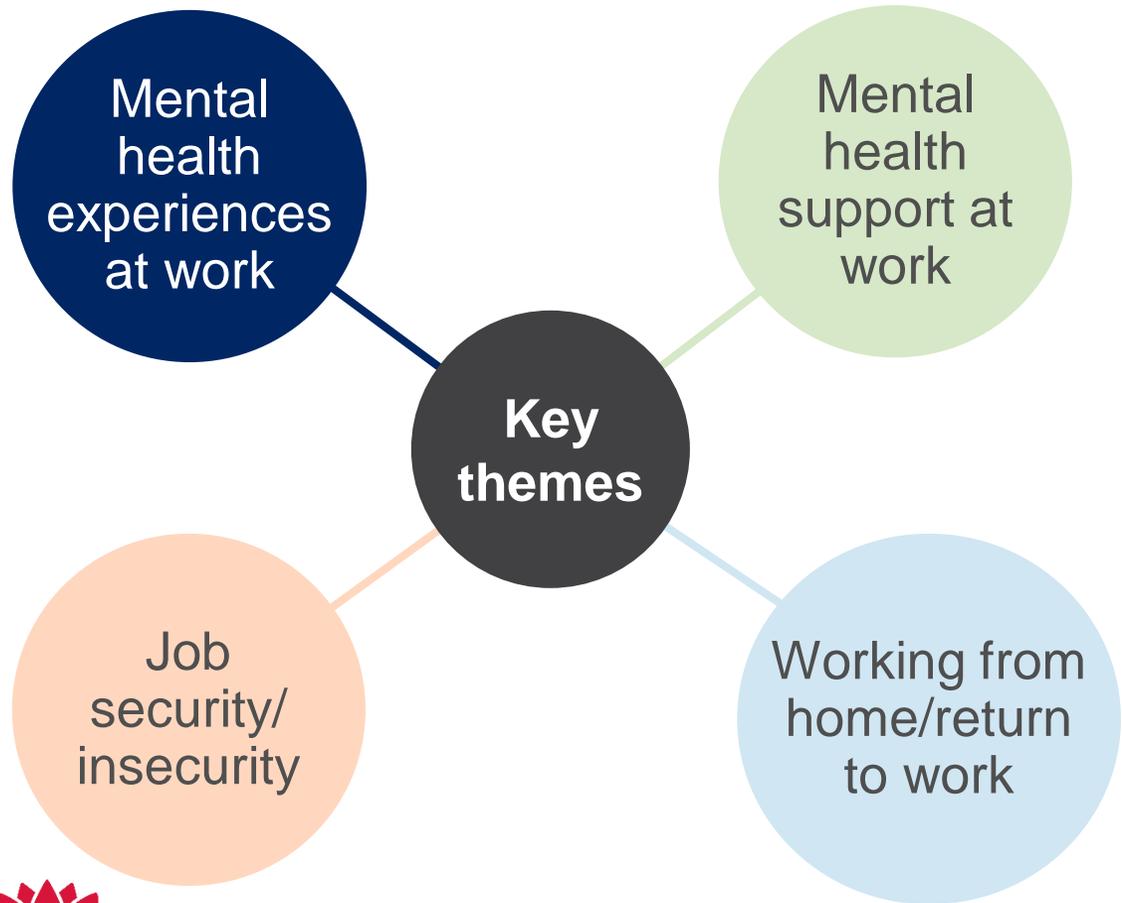

Manufacturing  
**300**

Arts and  
Recreation  
**268**

Transport  
Postal and  
Warehousing  
**261**

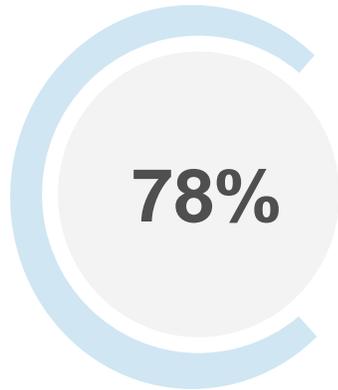

Other sectors: **2,470**

# Key themes

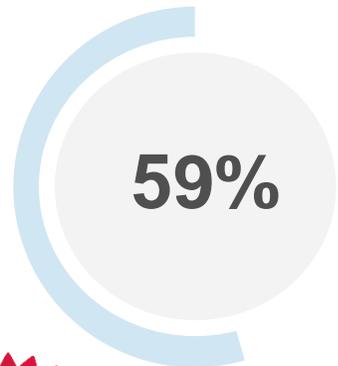

# Mental health experiences at work

The prevalence of mental health issues at work because of COVID-19 is high

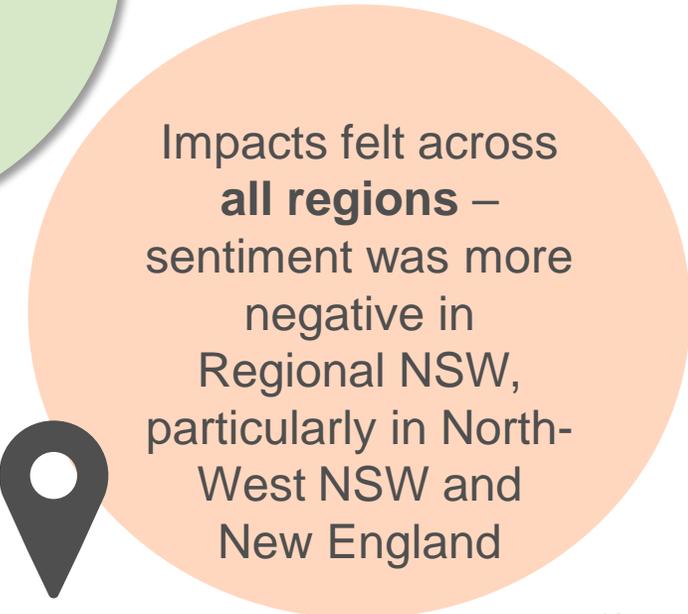

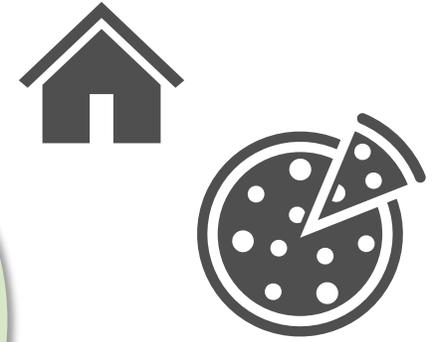

**Workers, managers and business owners** noticed an impact on their own mental health at work

Noticed mental health impacts on **colleagues**

Some sectors – **accommodation and food services** – were more impacted than others

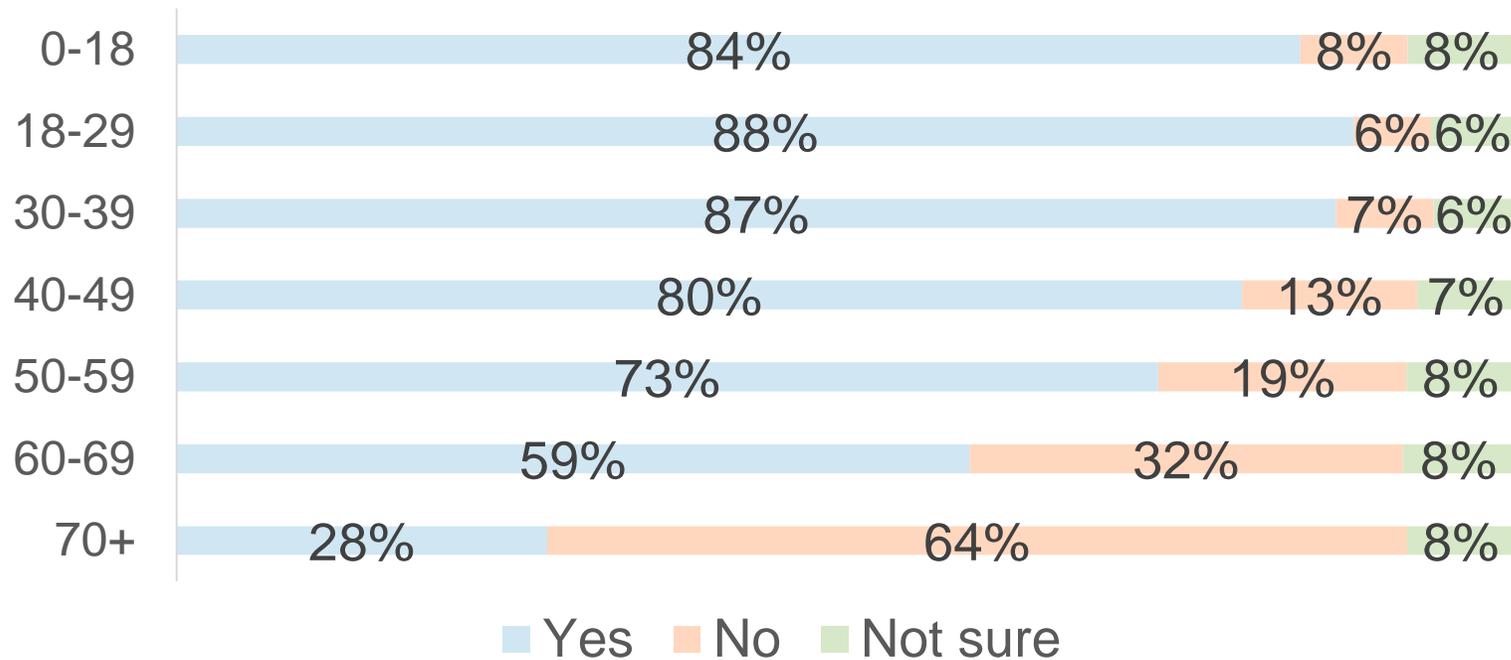

Impacts felt across **all regions** – sentiment was more negative in Regional NSW, particularly in North-West NSW and New England

# Mental health experiences at work

Noticed any impact of the COVID-19 pandemic on your mental health when working - age

## Causes in groups include:

**18-29:** lack of social contact and stress around casual/entry level employment

**40-49:** anxiety around effects on family as well as new ways of working and financial changes

**60+:** high number of issues working externally due to lack of technological skills and social interactions

# Mental health experiences at work

There was little mention about general fear of health regarding the virus itself

Almost all mental illness reported was caused by **work-related issues:**

Added pressure

High/low job demands

Financial stress

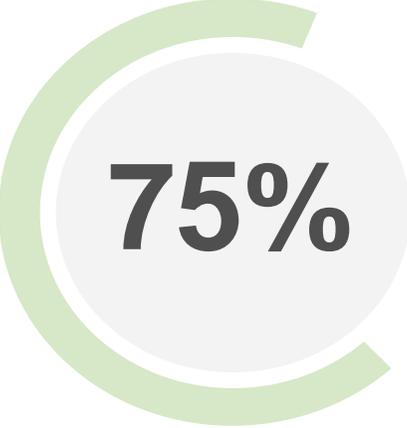

# Mental health experiences at work

59%

Noticed mental health **impacts on colleagues**

Consistent across age groups. However, those in middle age groups slightly more likely to notice an impact

75%

Three quarters of **managers** noticed an **impact on their staff**

## Most impacted sectors

Accommodation, retail and food

Arts and recreation

Education and training

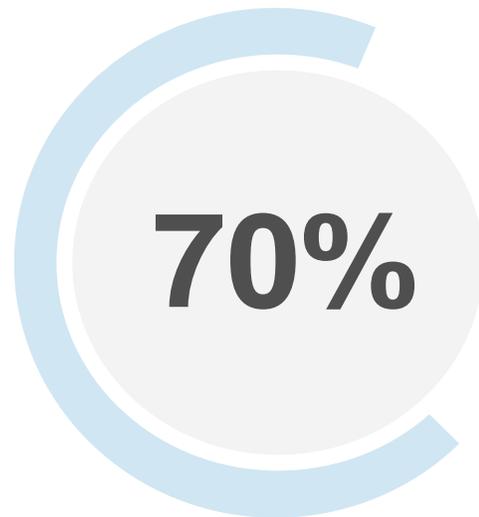

Health and social services

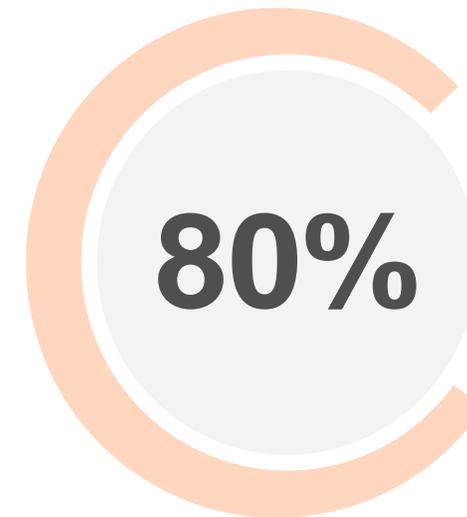

# Support for mental health at work

Employers were a key resource for respondents in tackling mental health issues

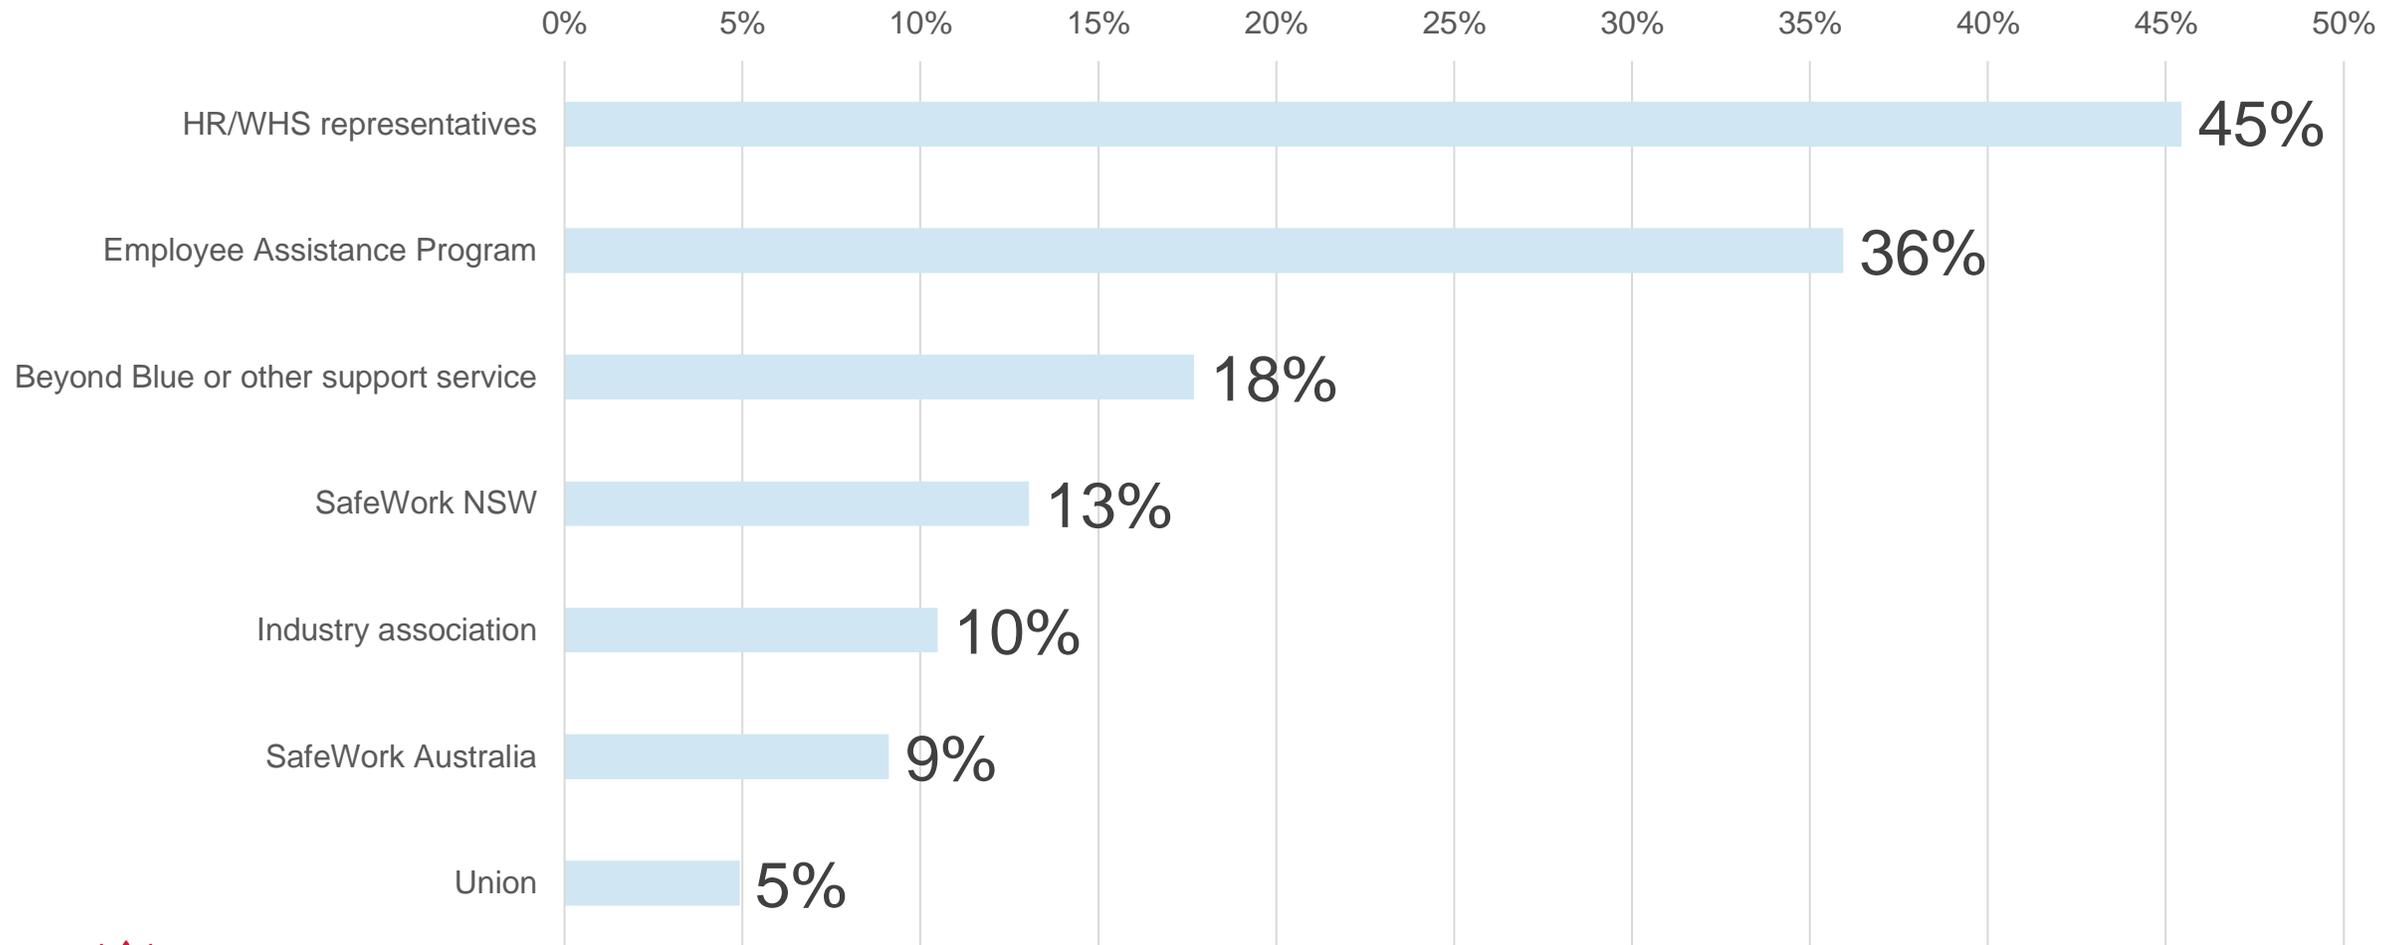

~ 70% of workers received some mental health support at work

> 80% of managers received some assistance at work

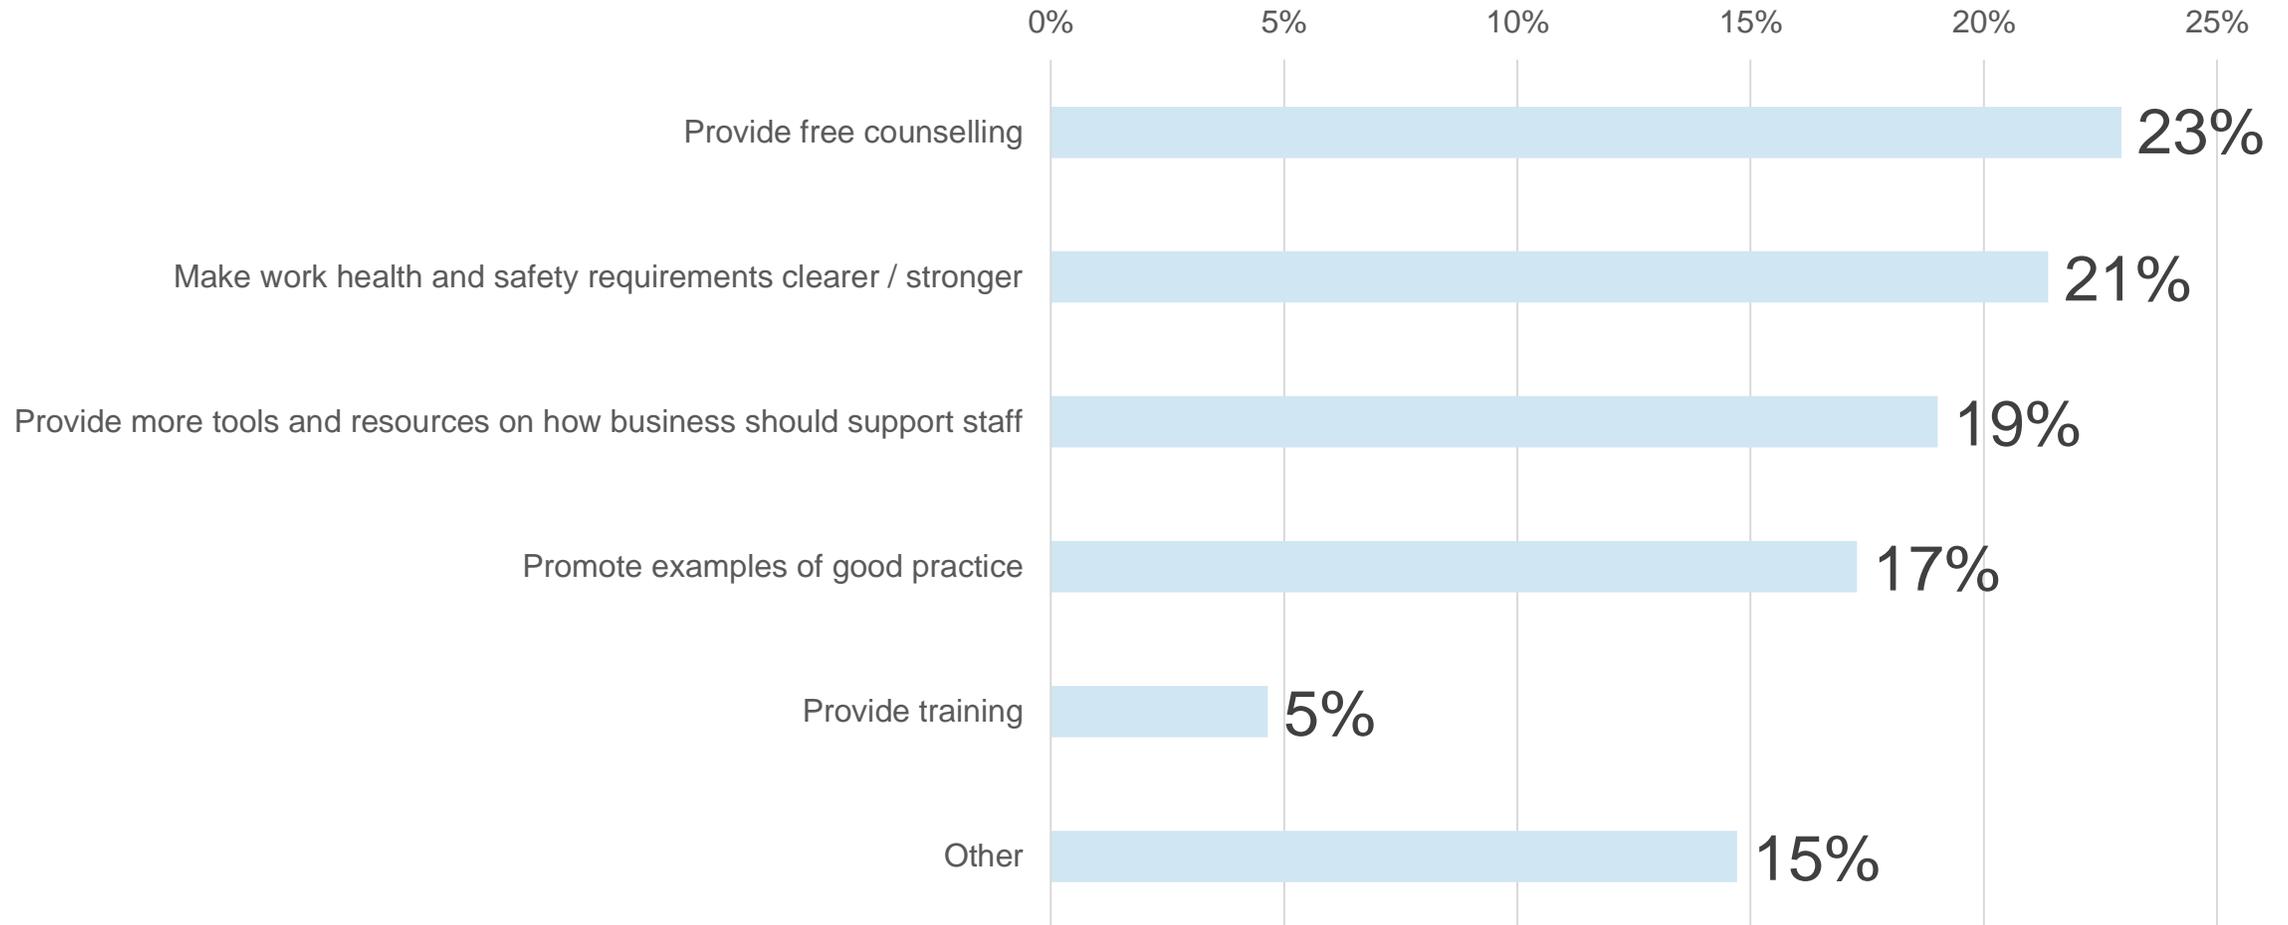

# Sources of support information for managers

26% of business owners and 22% of managers get information from SafeWork NSW and SafeWork Australia

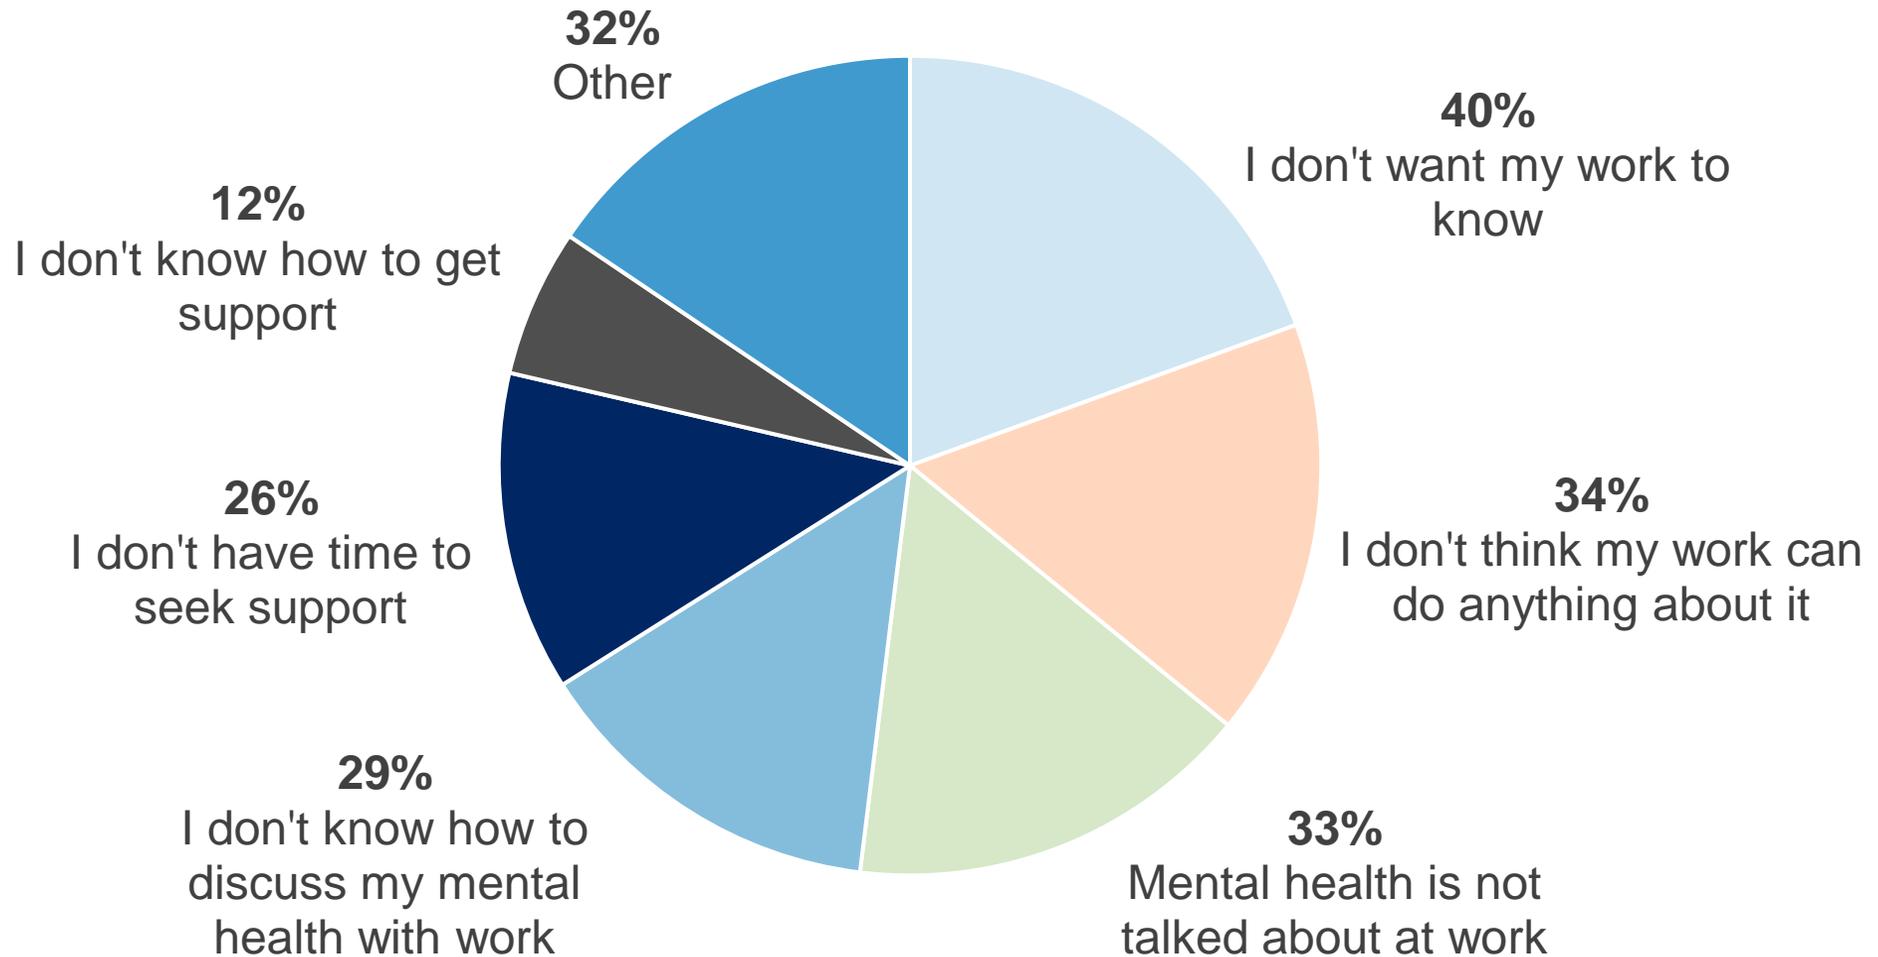

# Support that workers want from NSW government

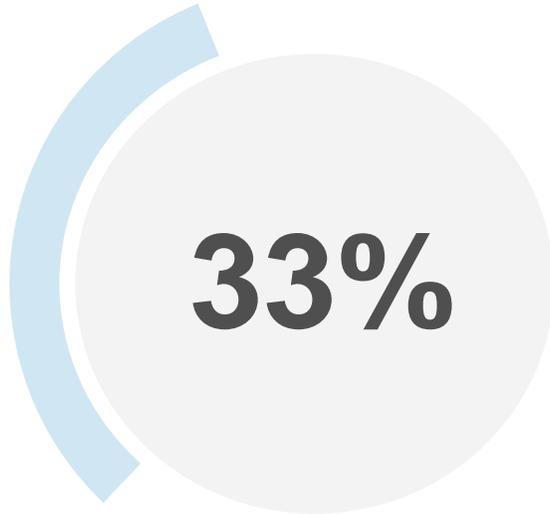

# Support for mental health at work

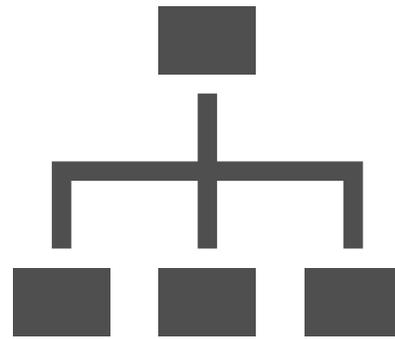

## Barriers for workers when seeking mental health support at work

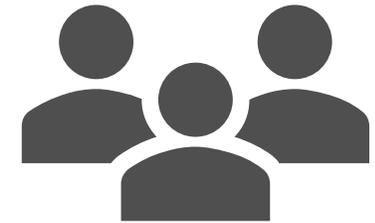

# Support for mental health at work

Of **workers** reported that they experienced **barriers** to accessing support at work

**Managers** experience fewer **barriers**, but the challenges were similar in nature

**Younger** age groups were more likely to say they had experienced barriers in asking for support

# Support for mental health at work

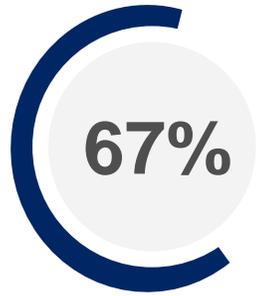

Those working in **accommodation** and **food services** are least likely to get help and **70%** report they get **no support from their work**

Construction workers also reported **barriers** to accessing support

# Working from home

Of managers **encouraged** people to **work from home**

Of respondents **spent some time working time at home**

**Retail, education, accommodation and food services workers are least likely to work from home**

# Working from home and return to work

Work from home is:

37%   
positive

56%  +   
a bit of both

7%   
negative

## Pros

- Increased family time
- More time for hobbies
- Avoiding the commute

## Cons

- Isolation
- Increased pressure
- Lack of socialising

# Working from home/return to work and public transport

50-59  
years

Generally more concerned about **public transport** because of issues to do with **social distancing**

View **working from home** much more **positively** due to **flexibility**

18-29  
years

More positive about returning to work

Those who rely on public transport to get to work are more likely to want to work from home and those in the inner city are more willing to make the short trip to the office

# Job security/insecurity

**40% of workers, and 36% of managers worry about their job security**

**40% of business owners had to reduce staff**  
28% reduced staff by more than 80%

**40% of unemployed said their work status was due to COVID-19**

# Job security/insecurity

Business owners that have retained staff because of **JobKeeper**

**JobKeeper mostly helped to retain workers in:**

Accommodation and food services

Information Media and Telecommunications

Education and training

# High-risk mental health concerns

251

251 individual responses related to high-risk mental health concerns around self-harm and/or suicidal behaviour

Most high-risk mental health concerns came from people aged 30-39 years old
