

Thank you                for your genuine and active work.

Thank you                for this opportunity to submit my take.

My submission. Dont publish my email address. Use my name

PM Albanese, all Federal and State Ministers, you all have the powers to fix all policies that are the root causes of compounding and escalating cost of unaffordable rentals and poverty.

Your legacy in your governance, to make the Intelligent Difference in returning the rights of every australain to afford the basic needs for survival.

Allowing decades of continuing depletion of wealth and well being of Australian Citizens into poverty, unaffordable cost of living and homelessness MUST END.

Continuing homelessness and poverty must not be your legacy in your governance, this cannot be Australia's legacy.

Citizens voted You into govt.

Citizens look to YOU, all current Federal and State MPs to make the Intelligent Difference.

Your collaborative efforts will be the pride of your many, many terms in government.

Return the rights of every australain to afford basic needs for survival...

Electricity, water, gas must be brought back under goverment control. These should never be privatised. Maximum profit in privatising caused unaffordability. FIX THIS

Affordable home ownership for every Australia. Non Australians must not be allowed to buy and own landed properties - residential, industrial and commercial. These are the root cause of runaway property prices. FIX THIS.

Privatised Health Insurance should not be pegged to maximise profit. FIX THIS

Set flat rate of 15% Income Tax and mandate 10% tax payer contribution to self home ownership fund. This future homeownership funds held by government and released to taxpayer to buy a house.

This will give every hardworking Australian certainty to home ownership. FIX THIS

Superannuation should never be privatised. It should never be pegged to private companies profitting from fees, charges and investment performance. Superannuation contributions must be accumulative, with compounding interest guaranteed by government, managed by government. FIX THIS

Automation and robotics takes away jobs. No jobs no taxpayers. Government cannot function without tax payers. Save jobs and create more jobs. FIX THIS

Australia's population of 27million and her tax payers cannot support other countries citizens on Australian welfare system. Somehow, public and social housing are taken up by older parents of China's one child policy...on family reunion visa. Australia cannot afford this. FIX THIS.

FIX ALL LOOP HOLES IN POLICIES THAT EAT AWAY AUSTRALIAN OWNERSHIP AND AUSTRALIANS WEALTH AND WELL BEING.
